

## Selecting a Science Leadership Case Seed

### *Process Prompt*

- 1) Review current list and jot reminder notes to help you remember the dilemma.
- 2) Add new challenges/dilemmas to the list. You can continue to do this throughout the day as other possibilities occur to you.
- 3) Star/highlight ideas with case potential. Consider whether the dilemma:
  - Is bigger than the personalities/quirks of my situation.
  - Has a story with a conflict/challenge and events.
  - Involves some complexity (e.g., different perspectives).
  - Holds some interest for you.
